

WEBER HSA GRANTS 2018

This year, the Weber HSA funded over \$40,000 in grants to support Weber teachers' requests to create and enhance innovative programs for our students.

These grants would not have been possible without the generous contributions the HSA receives throughout the year.

Thank you to all who support the Weber HSA!

HSA

Exploring Electronics

Science

Students will learn about electricity and magnetism with hands-on experiments.

Digital Art Class

Art

Support the introduction of a new digital art class in all grades. Digital art is a 21st century skill as careers in Art are dependent on digital media. Every single student at Weber will now explore this technology.

Active Learning Strategy

ELA Workshop

Improve an active learning environment for students with OT/PT needs by using equipment that allows them to move while sitting.

Laser Maze

Science

Students will work in groups, using a laser maze game, to explore angles and optics.

Inspire Through Art

Art / Building Beautification

Large pieces of well-known artwork will be prominently displayed in the building to inspire students.

Hydraulic Claws

Science

Students will learn about new physics and engineering science by building their own hydraulic-lifting claw.

Media Lab

Art / FACS / Music and Technology

Support the creation of a STEAM room that will encourage collaborative projects and interactions within the school. This multimedia space will include video recording, editing and broadcasting, photo lab, audio recording, digital arts and much more. This Media Lab will be utilized for multiple applications throughout all the departments.

"Be Kind" Mosaic

Building Beautification

A kindness-inspired mural will be created by our students and installed by the entrance for our community to enjoy.

Classroom Connections

Science / Tech

Teachers will now have the opportunity to live stream their classrooms throughout the school and have students share their work with their peers.

Planting Bulbs

Science / Building Beautification

Students will plant 1,000 bulbs in October for the Weber community to enjoy every spring.

Life Science Materials

Science

Upgrade the dissecting equipment for our science rooms.

We are grateful for all our parents' and teachers' commitment to work together, invest in our community, and support these projects that will enhance our programs and the overall experience of our students at Weber Middle School.

**Invest in your child's education and your community.
ENGAGE. DONATE. VOLUNTEER.**
