Construction Consultation and Management for Educational Facilities

June 20, 2019

Dear Parent, Neighbor, Faculty, Students and Other Concerned Parties:

As you are aware on March 10, 2015, the Port Washington community supported a bond referendum that would provide upgrades and additions to the school districts facilities. We are happy to inform you that after many months of planning by the District and their Architect the renovations of the Whitney Field are ready to commence.

The project kickoff meeting was held on Friday, June 7, 2019. The goal is to begin construction in early July with work continuing throughout the summer and into the winter with a completion date of December 31, 2019. The project shall consist of the following:

- New turf and walkways
- Installation of press box and bleachers
- Improved handicapped access
- New field lighting

Pursuant to the State Education Departments Regulation 155.5(d), the Port Washington Union Free School District shall at all times maintain a safe school environment throughout this project, including an update of the school emergency plan to reflect any temporary exits or procedures needed as a result of the construction work. The construction areas will be separated from occupied areas, all construction workers will be required to wear photo identification badges and noise levels will be kept to a minimum as to not disrupt the learning environment. All applicable Federal and State rules and regulations will be strictly adhered to throughout the duration of the project.

Thank you for your patience and cooperation during this time of construction. If you should have any questions please do not hesitate to call our field office at (516) 767 – 5214 and we will try to answer any questions that you may have.

Sincerely,
School Construction Consultants, Inc.
